Rich,
 The map was created in ARCGIS. The Cabot Well locations came from a file I downloaded from PADEP website. The location of residents came from an excel file that I formatted in order to import into ARCGIS. If you would like to see the live version of the maps please feel free to call me or have your contractor call me to sit down and look at the maps.

Rich- The real- GIS map is on your OSC page. loaded by Jim Bennett for me.... This one was modified from Jim's original to put in a HQ presentation and ATSDR used it for their report. The one on your OSC site has names of both the residents and Cabot gas wells. Jim can give you or your contractor a hand with the other map if you need it..

Subject: Dimock Site Map

Karen,

I understand that the map used in the ATSDR AROA (attached) came from you guys. What is the source (i.e. Cabot, PADEP, etc.)? We are trying to work on the issue of how large the size of the "site". This is a good map to start with as a reference. Unless its already done, I'd like our contractor to put it into standard GIS format.

Let me know what you know, so we move out from there.

thanks.

Rich
